The Carle Foundation is not requesting any genetic information in your response to this limited request for medical information. 'Genetic information,' as defined by the Genetic Information Nondiscrimination Act of 2008, includes an individual's family medical history, the results of an individual's or family member's genetic tests, the fact that an individual or an individual's family member sought or received genetic services, and genetic information of a fetus carried by an individual or an individual's family member or an embryo lawfully held by an individual or family member receiving assistive reproductive services. Such information is not responsive to this narrow inquiry regarding immunization and SHOULD NOT be provided.
